

Shima Nouri

SENIOR FRONTEND DEVELOPER

☎ (+98) 910-208-7537 | ✉ shiima.nh77@gmail.com | 🏠 shima.github.io | 📱 shima-nh77 | 🌐 shimanouri

Summary

Senior Frontend Developer with 5+ years building and maintaining high-traffic web applications, including nearly five years at Okala, one of Iran's largest e-commerce platforms serving millions of users. Specializes in React, Next.js, and TypeScript, with ownership of platform-level work including a Next.js 15 App Router migration, an Angular-to-React rebuild of internal tooling, and Core Web Vitals optimization across the customer-facing site. Delivers across customer, admin, and vendor surfaces, and additionally built a telemedicine platform from the ground up as a concurrent engagement. Mentors junior developers, leads code review, and partners closely with backend, product, and design teams in Agile delivery.

Experience

Okala — Large-Scale E-Commerce Platform

Tehran, Iran

FRONTEND DEVELOPER (REACT / NEXT.JS)

Oct. 2021 - Present

- Contributed to two major redesign initiatives on Okala's main customer-facing platform, improving UI/UX consistency and usability for millions of users, using React, Next.js, TypeScript, and Tailwind CSS.
- Improved core web performance metrics (LCP, CLS, FCP) on the main site through rendering optimization, code-splitting, and asset optimization, resulting in faster load times and higher user satisfaction.
- Migrated map services from Cedar Map to Neshan and Parsi Map with minimal user disruption.
- Upgraded the platform to Next.js 15 with the App Router, modernizing the codebase to improve maintainability and long-term scalability.
- Built a rule-based automation engine that adjusts store behavior in real time (e.g., automatic service-radius reduction) based on conditions such as weather and order volume, reducing manual operations work.
- Monitored and improved application stability using Grafana dashboards/alerting and the EFK stack (Elasticsearch, Fluentd, Kibana) for log analysis and error tracking.
- Shipped features, UI redesigns, and bug fixes across the Admin and Vendor Panels using React, TypeScript, Redux, React Query, and Ant Design.
- Played a key role in migrating the Admin Panel from Angular to React, supporting frontend architecture decisions for the platform's internal tooling.
- Applied AI-assisted, spec-driven development with Claude to write specs and scaffold implementation, and used it for code review and technical documentation, speeding up delivery cycles.
- Performed code reviews and supported junior developers with technical guidance and frontend best practices.
- Collaborated closely with backend, product, design, and operations teams in an Agile/Scrum environment.

Tapsi Doctor — Healthcare & Telemedicine Platform

Tehran, Iran

FRONTEND DEVELOPER (REACT / NEXT.JS) — CONCURRENT PROJECT

May. 2024 - Jan. 2025

- Helped build the Tapsi Doctor platform from scratch alongside the Okala role, helping shape core frontend architecture, routing, and reusable component patterns with JavaScript (ES6+), TypeScript, React, Next.js, Redux, React Query, and Tailwind CSS.
- Delivered a healthcare application supporting prescription and non-prescription drug sales, doctor appointment scheduling, and online medical consultations.
- Implemented key user flows including medicine ordering, appointment scheduling, and real-time consultation features.
- Partnered with backend, product, and medical domain stakeholders to translate healthcare requirements into reliable, production-ready features.

Darsoo — E-Commerce Platform for Mobile Phones, Tablets & Digital Gadgets

Tehran, Iran

FREELANCE FRONTEND DEVELOPER

Apr. 2021 - Oct. 2021

- Built responsive, user-friendly interfaces using JavaScript, jQuery, Axios, Ajax, HTML5, CSS3, and Bootstrap, ensuring cross-device compatibility and performance.
- Improved overall user experience and interface consistency across the platform.

Education

Islamic Azad University, Science and Research Branch

Tehran, Iran

M.S. IN COMPUTER SOFTWARE ENGINEERING

2020 - 2023

Islamic Azad University, West Tehran Branch

Tehran, Iran

B.S. IN COMPUTER SOFTWARE ENGINEERING

2016 - 2020

Skills

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries	React.js, Next.js (App Router, Next.js 15), Redux, React Query
UI & Styling	Tailwind CSS, Ant Design, Material-UI
APIs & Data	Axios, REST APIs, Microsoft SQL Server
Monitoring & Observability	Grafana, EFK Stack (Elasticsearch, Fluentd, Kibana)
Tools & Practices	Git, Agile & Scrum, AI-Assisted Development (Claude)
Spoken Languages	Persian (Native), English (Professional Working Proficiency)
